Academic Projects

HAS: Home Automation System

Asst. Prof. Jitendra Parmar

Jul'17 –Oct'17
IT Department,
SGSITS

A Android Application to control Home Appliances using Raspberry Pi. It was made as part of software engineering course. Aim was to get experience of the SDLC. We worked in a team of four.

I worked on following tasks:

- Highlight the Requirements of Application, prepared Software Requirement Specification (SRS) and then work with the team to write specifications for the modules to solve them.
- Prepared UML diagrams for Application.
- Code the front end of Application in Android Studio.

Technical

Books

Aug'17-Oct'17

- This app helps students to maintain list of books and their related data on the user inputs.
- User can do insert, delete and edit operations on their book data very easily
- Used main database concepts and content provider in application.

Whats Near Me

Nov'17-Dec'17

- A simple android application to display user location and searching location on user input using google maps api.
- It also displays nearest hospitals, schools, restaurants using google api web service.

Emojifier

Jan'18-Feb'18

- A fun android application implementing google mobile vision library to detect faces and uses classification to put respective emoji on them.
- User can save their emojiified images to gallery and can share with others.
