Academic Projects

HAS: Home Automation System   Jul'17 –Oct'17

Asst. Prof. Jitendra Parmar   IT Department, SGSITS

A Android Application to control Home Appliances using Raspberry Pi. It was made as part of software engineering course. Aim was to get experience of the SDLC. We worked in a team of four.
I worked on following tasks:
- Highlight the Requirements of Application, prepared Software Requirement Specification (SRS) and then work with the team to write specifications for the modules to solve them.
- Prepared UML diagrams for Application.
- Code the   front end of Application in Android Studio.

Technical

Books

Aug'17-Oct'17
- This app helps students to maintain list of books and their related data on the user inputs.
- User can perform delete , insert and edit operations on their books data very easily.
- Used main database concepts and content provider in application.

Whats Near Me   Nov'17-Dec'17
- A simple android application to display user location and searching location on user input using google maps api.
- It also displays nearest hospitals , schools, restraunts using google api web service.

Emojifier   Jan'18-Feb'18
- A fun android application implementing google mobile vision library to detect faces and uses classification to put respective emoji on them.
- User can save their Emojified images to gallary and can share it to others.
